

AMENDMENTS TO THE CLAIMS

1. (Currently Amended) A microwave oven having a coffee maker, comprising:

- a first housing including a cooking chamber which is opened or closed by a door, and a component chamber with electric components provided therein for irradiating microwaves into the cooking chamber;
- a second housing provided in the first housing and having an open side;
- a water reservoir provided in the second housing;
- a filter basket assembly provided to be withdrawn from or inserted into inside of the second housing, the filter basket assembly being separated from the water reservoir;
- a water supplying tube supplying water in the water reservoir to the filter basket assembly;
- a heater for heating water flowing through the water supplying tube; and
- a container provided to be withdrawn from or inserted into the second housing for receiving coffee dripped from the filter basket ~~assembly.~~ assembly.

wherein the water reservoir includes a handle projected on an outer surface thereof for easy grip.

2. (Original) The microwave oven having a coffee maker of claim 1, wherein the second housing is provided in front of the component chamber.

3. (Original) The microwave oven having a coffee maker of claim 1, wherein the second housing is provided next to the cooking chamber.

4. (Original) The microwave oven having a coffee maker of claim 1, wherein the water reservoir includes a receiving portion recessed on an outer surface of the water reservoir for receiving a part of the filter basket assembly.

5. (Original) The microwave oven having a coffee maker of claim 1, wherein the water reservoir and the filter basket assembly are provided at a same height.

6. (Original) The microwave oven having a coffee maker of claim 1, wherein the water reservoir is provided to be withdrawn from the second housing.

7. (Canceled)

8. (Original) The microwave oven having a coffee maker of claim 1, wherein the second housing includes a bracket projected from an inner wall thereof for supporting the water reservoir.

9. (Original) The microwave oven having a coffee maker of claim 8, wherein the bracket is elongated and is formed on an inner wall of the second housing for withdrawing the water reservoir from the second housing.

10. (Original) The microwave oven having a coffee maker of claim 1, wherein the filter basket assembly is hinge-coupled with the second housing.

11. (Original) The microwave oven having a coffee maker of claim 10, wherein the filter basket assembly is rotatably attached to the second housing such that the water reservoir is easily withdrawn.

12. (Original) The microwave oven having a coffee maker of claim 1, wherein the filter basket assembly comprises:

a cover hinge-coupled to a front of the second housing; and

a filter basket separably coupled to the cover.

13. (Original) The microwave oven having a coffee maker of claim 12, wherein the filter basket assembly further comprises:

an extension member provided at any one of the cover and the basket; and
a supporter provided at the other one of the cover and the basket for supporting the extension member.

14. (Original) The microwave oven having a coffee maker of claim 12, wherein the filter basket assembly further comprises a filter in a form of net inserted into the filter basket.

15. (Original) The microwave oven having a coffee maker of claim 1, wherein the filter basket assembly comprises:

a cover hinge-coupled to a side of the second housing; and
a filter basket separably coupled to the cover.

16. (Original) The microwave oven having a coffee maker of claim 15, wherein the filter basket assembly further comprises:

an extension member provided at any one of the cover and the basket; and
a supporter provided at the other one of the cover and the basket for supporting the extension member.

17. (Original) The microwave oven having a coffee maker of claim 15, wherein the filter basket assembly further comprises a filter in a form of net inserted into the filter basket.

18. (Original) The microwave oven having a coffee maker of claim 1, wherein the container is withdrawn separate from the filter basket assembly.

19. (Withdrawn) A microwave oven having a coffee maker, comprising:

a first housing including a cooking chamber which is opened or closed by a door, and a component chamber with electric components provided therein for irradiating microwaves into the cooking chamber;

a second housing provided in the first housing and having an opened front; a water reservoir provided in the second housing;

a filter basket assembly hinge-coupled to the front of the second housing and provided in front of the water reservoir;

a water supplying tube for supplying water in the water reservoir to the filter basket assembly;

a heater for heating water flowing through the water supplying tube; and

a container provided to be withdrawn from or inserted into the second housing for receiving coffee dripped from the filter basket assembly.

20. (Withdrawn) The microwave oven having a coffee maker of claim 19, wherein the second housing is provided in front of the component chamber.

21. (Withdrawn) The microwave oven having a coffee maker of claim 19, wherein the water reservoir includes a receiving portion recessed on an outer surface of the water reservoir for receiving a part of the filter basket assembly.

22. (Withdrawn) The microwave oven having a coffee maker of claim 19, wherein the water reservoir is provided to be withdrawn from the second housing.

23. (Withdrawn) The microwave oven having a coffee maker of claim 19, wherein the bracket is elongated and is formed on an inner wall of the second housing for withdrawing the water reservoir from the second housing.

24. (Withdrawn) The microwave oven having a coffee maker of claim 19, wherein the filter basket assembly comprises:

a cover hinge-coupled to the front of the second housing; and
a filter basket separably coupled to the cover.

25. (Withdrawn) The microwave oven having a coffee maker of claim 24, wherein the front of the cover has a surface continuous with a front of the door.

26. (Withdrawn) The microwave oven having a coffee maker of claim 24, wherein the cover is rotatably attached to the second housing such that the water reservoir is easily withdrawn when the filter basket is separated from the cover.

27. (Withdrawn, Currently Amended) The microwave oven having a coffee maker of claim 24, wherein ~~wherein~~ the filter basket assembly further comprises:

an extension member provided at any one of the cover and the basket; and
a supporter provided at the other one of the cover and the basket for supporting the extension member.

28. (Withdrawn) The microwave oven having a coffee maker of claim 24, wherein the filter basket assembly further comprises a filter in a form of net inserted into the filter basket.

29. (Withdrawn) A microwave oven having a coffee maker, comprising:
a first housing including a cooking chamber which is opened or closed by a door, and a component chamber with electric components provided therein for irradiating microwave into the cooking chamber;
a second housing provided in the first housing and having an opened front;
a water reservoir provided in the second housing;
a filter basket assembly hinge-coupled to a side of the second housing and provided at a same height as that of the water reservoir;
a water supplying tube for supplying water in the water reservoir to the filter basket assembly;

a heater for heating water flowing through the water supplying tube; and
a container provided to be withdrawn from or inserted into the second housing for receiving coffee dripped from the filter basket assembly.

30. (Withdrawn) The microwave oven having a coffee maker of claim 29, wherein the second housing is provided in front of the component chamber.

31. (Withdrawn) The microwave oven having a coffee maker of claim 29, wherein the water reservoir includes a receiving portion recessed on an outer surface of the reservoir for receiving a part of the filter basket assembly.

32. (Withdrawn) The microwave oven having a coffee maker of claim 29, wherein the water reservoir is provided to be withdrawn from the second housing.

33. (Withdrawn) The microwave oven having a coffee maker of claim 32, wherein the water reservoir comprises a handle projected on an outer surface of the water reservoir for easy grip.

34. (Withdrawn, Currently Amended) The microwave oven having a coffee maker of claim 29, wherein the second housing comprises a bracket formed on ~~on~~an inner wall of the second housing for withdrawing the water reservoir from the second housing.

35. (Withdrawn) The microwave oven having a coffee maker of claim 29, wherein the filter basket assembly is rotatably attached to the second housing such that the water reservoir is easily withdrawn.

36. (Withdrawn) The microwave oven having a coffee maker of claim 29, wherein the filter basket assembly comprises:

a cover hinge-coupled to a side of the second housing; and

a filter basket separably coupled to the cover.

37. (Withdrawn) The microwave oven having a coffee maker of claim 36, wherein a side of the cover has a surface that is continuous with a side of the first housing, and a front of the cover has a surface that is continuous with a front of the door.

38. (Withdrawn) The microwave oven having a coffee maker of claim 36, wherein the cover is rotatably attached to the second housing such that the water reservoir is easily withdrawn in a state that the basket is coupled to the cover.

39. (Withdrawn, Currently Amended) The microwave oven having a coffee maker of claim 36, wherein ~~wherein~~ the filter basket assembly further comprises:

an extension member provided at any one of the cover and the basket; and

a supporter provided at the other one of the cover and the basket for supporting the extension member.

40. (Withdrawn) The microwave oven having a coffee maker of claim 36, wherein the filter basket assembly further comprises a filter in a form of net inserted into the filter basket.
